

# LAB 11

## Python Standard Libraries

**1.** Perform the following tasks on “data.csv” using pandas.

- Handling Empty Cells
- Handling Data in the Wrong Format
- Handling Wrong Data
- Handling Duplicates

**2.** Read “dist\_data.csv” and save following distributions in separate files.

- Marginal distributions
- Conditional distributions

Note: You must check each of the distributions.

**3.** Plot every dataset in part 1 and part 2.
